B.Com Student | CMA Aspirant | Building Businesses & Content | Tech Enthusiast] Open to Diverse Career Opportunities
Greater Raipur Area

Summary

About Section (updated):I bridge the gap between financial precision and digital innovation. I'm a B.Com student and CMA Intermediate candidate, bringing a disciplined approach to commerce, cost management, and data analysis.Beyond the balance sheet, I'm a tech enthusiast and entrepreneur. I run my own e-commerce venture, JMA Hub (Jai Maa Ambe Grease Corner), and I'm building Bharat Path, a travel-tech initiative — my canvas for learning app development, business operations, and AI-driven problem solving.Projects:• JMA Hub (Jai Maa Ambe Grease Corner) — Built and manage a grease/lubricant e-commerce store, handling the storefront, admin operations, and customer experience end-to-end.• Bharat Path — A travel-tech web app designed to help users explore destinations, built and deployed live.I have a genuinely curious mind and enjoy exploring different fields — finance, logistics, technology, marketing, and digital content creation. I'm particularly drawn to the intersection of finance and technology within sectors like Logistics and Port Operations, where I find the scale and operational complexity fascinating.I'm open to internships, entry-level roles, and opportunities across finance, operations, business development, marketing, or tech. My goal is simple: to build solutions that are both economically viable and technologically advanced. Always excited to connect with professionals across industries and learn from their journeys.

Experience

Concept Developer

Developed a comprehensive business plan for a tourism-based application focusing on user experience and local travel solutions. Conducted market research to identify monetization strategies and technical requirements for app development. Analyzed travel trends in India to create a unique value proposition for domestic travelers.
